

NutraCap™

THE FIBER-BASED CAP BUILT TO BUILD BRANDS

**The world's first and only fiber-based closure
designed for the supplement sector.**

NutraCap is a breakthrough in sustainable packaging – a molded fiber cap that's recyclable as paper and biodegradable in natural environments. Developed as a drop-in replacement for plastic, NutraCap helps private label brands meet rising demands for sustainability without disrupting production or compromising quality.

Sustainable by Design

- Recyclable in the paper stream
- Cellulose fibers do not cause any microplastics when breaking down in nature
- Significantly reduced CO₂ footprint
- Made from FSC®-certified renewable fibers

Proven Compatibility

- Standard neck sizes (38mm and 45mm)
- Seamless switch with no line adaptation
- High torque strength, tamper-evident ready
- ISO 22000 certified for food safety

Commercial Impact

- Eye-catching differentiation on shelf
- Aligns with retailer and consumer sustainability priorities
- Supports plastic tax compliance and ESG positioning
- Consumer-tested preference for fiber over plastic

Powered by Blue Ocean Closures

NutraCap is developed by Blue Ocean Closures, a leader in fiber-based closure innovation. Our technology is scalable, proven, and designed for the future of packaging.
